INTRODUCTION

I am a QA Tester with over 7 years of experience in Manual and Automation Testing across Web, Mobile & Desktop Applications, experienced in designing, executing, and maintaining test strategies, focused on functionality, usability, security and user experience.

EXPERIENCE

QA Manual & Automation at Excel Medical

03/2024- until present

Executing comprehensive manual and automated testing across Desktop and Mobile platforms to ensure optimal UI design, layout precision, and seamless overall functionality. Specifying in the end-to-end validation of critical, high-security workflows, including digital medication prescriptions, patient platforms, and credit card payment processing. Developing, scaling, and maintaining automated test suites using JavaScript and Cypress to ensure robust regression coverage. Writing detailed testing scenarios and technical documentation to support continuous integration.

Technologies used:

JavaScript, Cypress, Postman, GIT, Jira;

QA Manual & Automation, Front-end Developer & Critical Support Administrator at Class It Outsourcing

02/2020-10/2023

Manual & automatic Testing Websites and IOS Applications, using Postman & Selenium. Writing testing scenarios and documentations. Monitoring, backup administration(Veeam), configuration of Windows and Linux servers. Developing and designing webpages maintaining height performance and adaptive modules. Write clean, well structured maintainable code that conforms with accepted standards.

Technologies used:

PHP, HTML, JavaScript, CSS, CSS3, HTML5, Bootstrap, Angularjs, ReactJS, Postman, Selenium, GIT;

Software QA Engineer at PayScout

01/2019-12/2019

Testing credit cards, using Selenium to make manual testing into automatic.

Technologies used: Selenium and Postman;

Game Tester at Ea Games

02/2016-04/2018

Testing video games on ps3, ps4, XPO, pc and report the bugs.
